December, 1949

MONTANA HIGHWAY PLANNING SURVEY

COUNTY AND LOCAL FINANCE REPORT
For Fiscal Year Ending June 30, 1949

Transmitted herewith is the Montana Local Road Finance Report for the year closing June 30, 1949.

These data were compiled from the printed records of the county clerks annual reports which are a true accounting of the unit operations. This department derived the information from the State Examiner's Department where the county clerks' reports are on file and by correspondence with county clerks. Through this method of procedure it is believed that the results are, within a reasonable latitude, authentic and reveal the true status of facts.

All local governmental units in Montana operate on the fiscal year basis; they also have some amount of exchange work or transfer of moneys from one department to another. The accuracy of the information is further enhanced by the revenue laws within the State which are clearly defined, and rarely do two or more types of governmental units participate in the same source of revenue. Thus, with these conditions of fact, the compilation of information is readily made and it is possible to arrive at final results with a greater degree of accuracy than might otherwise be the case.

All information desired was available from records in the State Examiner's department or obtained by correspondence with the county clerks for data not reported. Through an analysis of the county records, moneys having to do with public roads under each unit's jurisdiction were determined as to receipts, disbursements, and the status of bonded indebtedness.

The information gathered is drawn up on the basis of warrants paid, because it was disclosed that the cash account was easier to handle than the warrant account. To facilitate a proper interpretation of these data, the following explanation of each form is given.

Form LF-1 County Road and Bridge Finance Report

Items 1 and 13, Balances on Hand

A. Highway Funds. This amount was readily available from the "operation of the funds account", where the counties segregate the amounts of moneys on hand for road purposes under the Road fund and Bridge fund.

B. Highway Bond Interest and Sinking Funds. These figures, carried forward from the previous year, were originally computed on the basis of the relative amount of bonds outstanding for road and bridge purposes, in the particular unit, to the total amount of bonds outstanding for all purposes when all bonds are not segregated. By virtue of the fact that levies, collections and disbursements for all bond issues within the county are shown in the funds accounts under one fund, the "Bond Interest

and Sinking Fund", it was necessary to arrive at that portion of bonds outstanding for roads and bridges in order to determine the portion of the whole to apply under this item in those counties where segregations on bonds are not made.

2. Receipts from County Revenue Sources.

These receipts were clearly defined on the county records and relatively simple to determine. Under "Tax levies" have been listed current and delinquent tax levies for road and bridge purposes.

Miscellaneous receipts in this year studied, such as refunds etc., were treated as deductions from gross as outlined in the comments attached to Mr. Curtiss' letter of September 5, 1940 regarding Montana's county and local fiscal study for 1937, 1938 and 1939.

3. Receipts from the State Government.

All moneys listed under this item are fees collected from motor vehicle owners. Actually, the registration fees proper are collected by the counties and retained by them; only that portion collected for transfer, certificate of title fees, etc., being furned over to the State. That portion necessary for administration and operation is used by the State Registrar of Motor Vehicles and the remainder is distributed at odd intervals to the counties in proportion to their total registrations. For the purpose of this study, however, all registration fees were shown as having been received by the State and turned over to the counties.

4. Funds Provided by the Federal Government.

The only item of receipt under this caption is that portion of the Forest Reserve apportionment money which is used for roads. The State receives these moneys and redistributes them to the counties, and they in turn allocate two-thirds to the road fund and one-third to the school fund. The apportionment for the year has been checked with the State figures. In addition, Sanders county received a Federal Grant for bridge construction due to flood damage.

5. Proceeds of the Issues of Bonds and Notes.

During the fiscal year ending June 30, 1949, no original issues or refunding bonds were issued. It will be noted that no short term notes are reported; the reason being that all governmental units in Montana operate under the budget system with no legal provision being made for temporary borrowings other than through the issuance of registered short term tax anticipation warrants. The State has determined that the amount of warrants outstanding for county roads and bridges as of 6-30-40 equaled $289,981.62, on 6-30-41 equaled $184,150.54, on 6-30-42 equaled $132,196.33, on 6-30-43 equaled $60,960.37, on 6-30-44 equaled $93,093.71, on 6-30-45 equaled $142,888.07, on 6-30-46 equaled $109,639.22, on 6-30-47 equaled $131,160.57, on 6-30-48 equaled $147,719.82 and on 6-30-49 equaled $223,094.31. It is hoped that this information will prove helpful.

Disbursements During Year

8. Construction and Maintenance of Roads and Bridges.

a. Direct Expenditures by Counties.

The counties made expenditures on roads under their jurisdiction, on State highways and within city limits.

To arrive at the portion of county expenditures for construction or maintenance, it was necessary through their detailed records to segregate those amounts spent which could be definitely allocated to these functions. Even with this close analysis, it should be understood that the minor governmental unit's interpretation of the classification of work varies in accordance with individual viewpoints within each county. Taking this factor into consideration, it is believed a just and proper amount has been established for construction as well as for maintenance work.

Under the present method of county accounting practices, it is felt that it is impossible to arrive at a more satisfactory conclusion regarding construction and maintenance expenditures.

It will be noted that shop expenditures for construction and maintenance were separated from other county road and bridge expenditures.

The total shop expenditures were pro-rated between maintenance and construction on a 75-25% basis. Samples were obtained by contacting county officials and about 75% of the total shop expenditures were spent on maintenance, the remaining portion for construction.

The State desires this information for other financial studies.

b. Contributions to Other Governmental Agencies for Roads.

This item is the receipts for the year for city street construction by the cities of Butte and Walkerville, Montana, from the Silver Bow County Registration fees, and Anaconda, Montana, from the Deer Lodge County Registration fees. The Revised Montana Statutes now provide that cities of "thirty-five thousand (35,000) population and over or cities which lie within one mile of the city limits of an incorporated city of the state of Montana having a population of thirty-five thousand (35,000) or more, according to the 1930 U. S. Bureau of Census Reports, shall receive fifty (50) per cent of the registration fees collected by the county from residents within the city limits of such cities, "this refers to Butte and Walkerville only, and "twenty-five (25) percent of the net license fees derived from the registration Motor Vehicle licenses by any city having a population of ten thousand or more, according to the Federal Census of 1940 and which is situated in a county which has an area of less than seven hundred and fifty(750) square miles". This refers to Anaconda only.

9. Miscellaneous Highway Expenses not Included in Other Items.

Item 9a is made up almost entirely of salary and per diem payments from the road and bridge fund to County Commissioners and County Surveyors.

b. Expenditures for tools and machinery were separated from costs in Item 8. This information is also desired by the State for other financial studies.

c. Under this item has been listed Industrial Accident

Premiums of that amount of moneys paid during the year by the counties to the State Industrial Accident Board for employee accident insurance. This total has been checked with the State receipts.

d. Under this item has been listed the amount of moneys paid for equipment and other miscellaneous insurance.

e. Under this item has been listed the amount of moneys paid during the year by the counties to the Montana Public Employees' Retirement Board.

10. Debt Service.

To determine the road and bridge bond interest and redemptions, it was necessary, as in items 1 and 13, to first arrive at the proportionate amounts of bonds outstanding for these purposes in relation to the total amount of bonds outstanding for all purposes within each unit.

County records are maintained considering the whole of the issues, with no pretense of a segregation or detail of the various funds making up the total in some counties. With this condition it was felt that the only feasible method of arriving at a segregation of road and bridge moneys involved was on a percentage basis, or relation of the combined amount to be expended or disbursed for road and bridge purposes to the amount of the whole issue. This method was used in the analysis of each unit.

Particular care was taken that such operations as that between Silver Bow County and the City of Butte in connection with motor vehicle license collections were so handled as to preclude inflation if county and city expenditures and original receipts were to be included in one table.

Forms LB-1 and LB-a

These forms were developed to record essential data on county road and bridge bonds.

The data presented are the accumulated totals of all counties in the State, recapped from the analysis of the records of the individual units. The only factor of approximation entering into these statistics is, as has previously been described, the method of determining the amounts of funds having to do with roads and bridges. It is believed that, with this exception, the detail of the forms themselves is self-explanatory and readily yields the information necessary for the proper interpretation to the results shown.

Form LF-2, City Street and Alley Finance Report.

This form is designed to reveal the detail of the receipts and disbursements for streets and alleys of the cities and towns in Montana.

These data were gathered through personal interviews with the city and town clerks and treasurers, or through information received from the State Examiner's Department.

To secure the desired results it was essential in each instance to determine those special improvement districts which were primarily established for the construction or betterment of streets and alleys in accordance with the interpretation of those classifications of work to be considered. This was accomplished through investigating the records citing the history of the projects undertaken. All special improvement districts within the cities are treated as trust and agency accounts, with a detailed operation of funds records for each one. It was possible through a study of these funds accounts to determine the data essential for the completion of this study.

In line with comments received from Washington, the UF-2 form has been revised. The closing balances are detailed in accordance with the opening balances, thus enabling a balanced statement to be made for both city general street and alley funds and special improvement district operations. Further, it will be noted that as suggested, the receipts and expenditures for street cleaning, street lighting, garbage removal and the construction of sidewalks and sewers have not been included as street functions of municipalities.

The city status in regard to the issuance of short term notes is the same as that of counties, in that there are no statutory provisions permitting this practice. However, the policy of issuing short term tax anticipation registered warrants is practiced among the cities. In some instances in the street and alley funds proper, no registered warrants show against any special improvement district anticipated funds. The following schedule shows the warrants outstanding as of the beginning and ending of the year.

Population	Outstanding beginning of year	Outstanding end of year
0 - 1,000	$ 248.48	$ 4,304.69
1,001 - 2,500	5,239.36	12,282.68
2,501 - 5,000	1,965.25	7,485.42
5,001 - 10,000	45,873.40	73,282.85
10,001 - 25,000	27,353.02	16,694.77
Billings	3,765.00	1,203.75
Butte	4,802.82	2,356.51
Great Falls	3,273.81	36,108.89

It will be noted in this report that the city of Billings has been deleted from the population group of 10,001 to 25,000. Billings has now attained an unofficial population far exceeding the 1940 census and this department believes it justifiable to classify this city with Butte and Great Falls.

Disbursements During Year

The segregation of the direct expenditures from regular city funds, as shown for the year, was compiled from the records of the various cities and towns. Here too, however, as in the cities, there are no set standards and the accurancy of the distribution is entirely dependent upon the reliance which can be placed on the opinions of those officials who have the responsibility for the work.

The segregation of the direct expenditures from special assessment district funds can be accepted with a greater confidence, due to the description of each project which specifically outlines the work undertaken.

Forms LF-2 and LF-2a.

These forms for incorporated cities and towns were developed to record essential data on street and alley bonds, including city proper and special assessment districts.

The problems encountered in the development of these data are relatively the same as those for counties. It is believed the forms are self-explanatory and yield information necessary for the proper interpretation of the data submitted.

FORM LF-1

COUNTY ROAD FINANCE REPORT

ALL COUNTIES

State of Montana — For fiscal year ending 6-30-49

RECEIPTS DURING YEAR

1. Balance on hand at beginning of year: Sp.Rd. & Post War		$ 389,421.22
a. Highway funds	$ 1,952,154.06	
b. Bond int. & sinking fund (incl. cash & invest.)	$ 99,864.03	$ 2,441,439.31
2. Receipts from county revenue sources:		
a. Road property tax levies		
(1) For current work	$ 3,362,671.40	
(2) For debt service	$ 74,467.61	$ 3,437,139.01
b. Bridge property tax levies:		
(1) For current work	$ 1,296,181.89	
(2) For debt service	$ 11,035.08	$ 1,307,216.97
c. Appropriations from county general or other non-highway funds:		
(1) For current work	$ 124,914.57	
(2) For debt service	$	$ 124,914.57
d. Special Post War Levies	$ 23,228.29	
e. Special Road Levies	$ 3,473.10	
f. Bridge, ferry or road tolls	$ 865.54	
g. Earnings of sinking funds (interest, etc.)	$	
h. Miscellaneous unclassified receipts	$ 221,756.08	$ 249,393.01
Total (a to h incl)		$ 5,118,663.56
3. Receipts from State Government:		
a. Motor vehicle revenue - Registration fees	$ 2,070,243.31	
b. Other (specify) From State Highway Department	23,759.19	
Refunds from Registrar	$ 24,520.33	$ 2,118,522.83
4. Funds provided by Fed. Govt. (do not include loans):		
a. By Public Works Administration	$	
b. Forest reserve appropriations	$ 87,792.38	
c. By other agencies (specify)		
Federal Grant for Bridge Construction	$ 5,000.00	$ 92,792.38
5. Proceeds of issue of bonds (incl. Federal Loans):		
Bonds		
(1) Original issues	$	
(2) Refunding issues	$	$ -0-
6. Total receipts during year (2 to 5 incl.):		$ 7,329,978.77
7. Total funds available (1/6):		$ 9,771,418.08
